

## License information

### V6 Enterprise Gold Edition

- ⇒ This license permits the use of the software on up to 1000 computers at one site (e.g. one office, one branch) of your company. Companies with more than one location need multiple licenses (one license for each location) or to upgrade to a world license. Passing the license to third parties or to other locations of the same enterprise is not permitted (even not when it's part of your own applications).
- ⇒ This license includes a developer-license for up to 1000 developers at one site (e.g. one office, one branch) of your company. Companies with more than one location need multiple licenses (one license for each location) or to upgrade to a world license. Passing the license to third parties or to other locations of the same enterprise is not permitted. The owner of a developer-license can redistribute the ActiveBarcode control as part of his application to third parties like customers and/or other sites of a company. A developer-license is bound to a single developer. Each developer actively working with ActiveBarcode needs a developer-license. This license covers up to 1000 developers at one site. This developer-license is limited to 10000 redistributions or 10000 possible end users - whichever is higher. You were allowed to provide the ActiveBarcode control bundled with your own application to a third party as well as to other sites of your own company.
- ⇒ Developer-licenses are intended for redistribution to third party. Development of in-house applications is allowed. We ask that your own application is not cloning the functionality of the ActiveBarcode Application and the ActiveBarcode Control itself. The developer-license is never hand out to anyone else but the developer who is owning the license.
- ⇒ This license covers up to 1000 web/servers at one site (e.g. one office, one branch) of your company. Companies with more than one location need multiple licenses (one license for each location) or to upgrade to a world license. This license can be used in server applications like web-servers, terminal-servers or Citrix-servers. This license permits the use of ActiveBarcode application and ActiveBarcode control on up to 1000 servers for internet-, intranet or other server-based applications. The max number of total users per license is limited to 10000. Each production server instance needs one license; this is also true on virtual machines.

THIS LICENSE IS VALID FOR  
UP TO 1000 USERS AND  
1000 DEVELOPERS AND  
1000 SERVERS  
AT ONE SITE

and registered for the address of your invoice.

Keep your invoice as proof of purchase and license.
